5 NOVELTIES EVERY MONTH

ALL YEAR ROUND!

The only thing that is constant is change

Heraclite of Ephesus

WHAT IS THIS ABOUT?

Life and business is moving to the Internet. We meet the needs of our customers, we also try to take care of sustainable development and reduce CO2 emissions. Following this premise, we have decided that instead of two seasonal catalogs from 2021 we will print one all year round. However, in order to fill the void and there was no shortage of novelties, we have introduced a series of regular, monthly 5 product releases - FANTASTIC 5.

HOW IT WORKS?

At the beginning of each month (except for February - this month our catalog for 2021 comes out) we will send you an email with a promotional video and presentation of new products. Watch our profiles as well in social media, we are preparing there a lot of attractions, and from time to time we'll override a piece of the secret about the next premiere. Stay alert, the next edition is coming!

Follow us and stay up to date!

Bluetooth speaker

Take your music with you wherever you are!

More than one function

Most of our loudspeakers have a built-in microphone (see the table below) this allows you to use them as a hands-free set for your phone to answer and make calls.

No installation

Unlike other complicated devices, Bluetooth speakers do not require installation, all you have to do is place them within ten meters of the source device and connect them via Bluetooth. It's simple.

Size adjusted to your needs

A Bluetooth speaker is a definition of a mobile gift. Depending on the situation, you can choose a small size in the form of a phone pendant connected to a mini jack port of your phone or choose a higher speaker power in a sturdy casing.

DID YOU KNOW...

At the beginning of the 18th century, the Swedish naturalist Carl Linnaeus planted the first flower clock in the Botanical Garden in Uppsala, Sweden. He created a round flower bed divided into 12 parts. The whole thing was based on the characteristic hours of opening and closing of petals for different types of flowers, so you could determine the time of day just by looking at the garden. If you do not have this type of garden, wall clocks also work well.

Power bank

Reliable power source
Anytime, anywhere

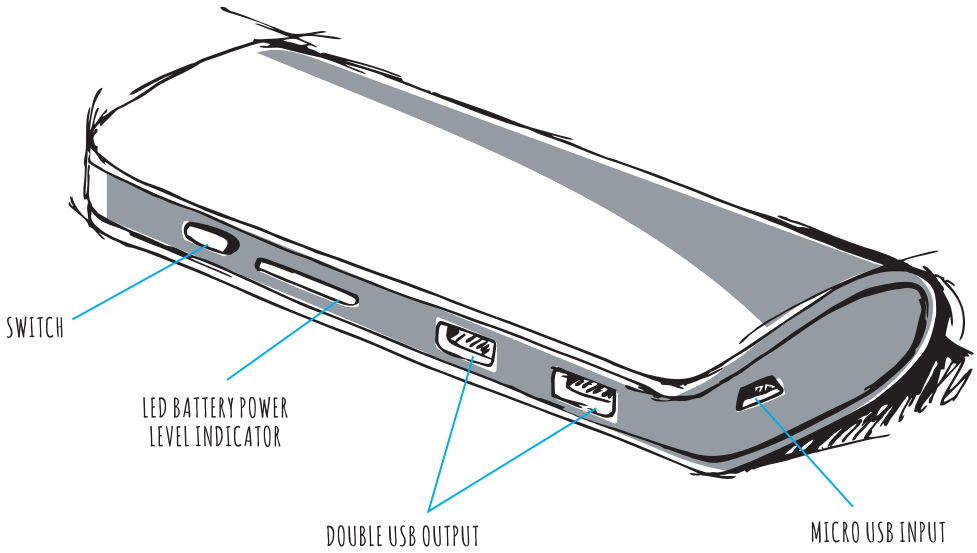

Nearly 75% of global population uses mobile devices

1 in 3 people complains about short-lasting batteries

Every new generation of mobile devices requires more energy

Important to know!

It is worth remembering that during charging, inevitable energy losses occur, which may reduce the real power bank efficiency to as much as 75%. This is a completely natural phenomenon and should be taken into account when selecting the capacity of the power bank.

mAh miliampere-hour

mAh is a miliampere-hour, the unit for batteries capacity. The value in mAh means how many energy can be storaged. Power banks with higher mAh capacity can recharge more devices.

USB ports the more, the better

Power bank may have more than one USB output, which allows you to charge multiple devices simultaneously. Each output may have different amperage dedicated for different mobile devices.

PAY ATTENTION!

- Device's capacity
- Shape and dimensions
- Amperage – time of recharging

Power banks come with 12 months warranty and CE certificate.

infoGRAPHIC

Induction

Charge the phone without connecting it to the charger

Is inductive charging safe for people?

According to information provided by the World Health Organisation, to date scientific evidence does not support the link between symptoms (such as headaches, anxiety and nausea) and exposure to electromagnetic fields. Their occurrence can often be caused by noise or by concerns about the presence of new technologies.
The level of radiation emitted by wireless chargers is much lower than emitted by other household appliances such as microwaves, mobile phones, televisions and vacuum cleaners.

Durability

You don't have to connect or disconnect your devices every time, so you can avoid damaging the USB connector.

Convenience

Place the phone on a dedicated charger (induction board) and it will start charging. You can reach for it at any time and leave.

Aesthetics

Original designs make your charger a decorative element as well.

IT IS WORTH REMEMBERING!

Do not place the charger in close proximity to strong electromagnetic fields such as other induction chargers. The recommended distance should be at least 3 cm.

DID YOU KNOW...

Before pens were invented, people used many different tools to write. The first writing instrument was the finger with which a person created symbols in the mud. Later pieces of metal or bone were used. The ancient Greeks and Romans practiced writing on wax tablets with a sharp stylus, while the Egyptians preferred a hollow reed and papyrus.

DID YOU KNOW...

The pen prototype was invented in 1938 by a Hungarian journalist and newspaper publisher Laszio Biro, but the first patent for this type of writing instrument was granted 50 years earlier. In 1888, John J. Loud presented a roller pen to the world, but his invention did not gain recognition in the eyes of his contemporaries and only half a century later, perfected by Biro, it became obvious choice for writing.

How does the touch screen work?

Most of the mobile devices are equipped with a capacitive touch screen. By touching the screen, a local electric capacity in the given point is changing – and this action is read by the device. This type of touch screen won't respond to cold hands, gloves or plastic stylus.

Touch Pen is a useful gadget for every mobile device owner. It makes using touch screens possible anywhere, anytime and regardless of the weather.

Use for multimedia presentations

Use in winter, while wearing gloves or in bad weather conditions

DID YOU KNOW...

Pens are not only useful for writing. Fisher Space Pen Company boasts that in 1969 the pen helped Apollo 11 succeed in its mission. During a capsule crash on the way back from the moon, astronauts used a pen instead of a broken button to return to Earth. "Buzz" Aldrin, one of the members of the Apollo crew, still holds this pen as a priceless treasure that saved his life.

DID YOU KNOW...

Although it is impossible to say for certain when the first hammock was created, many anthropologists believe it comes from South America and was invented more than 1,000 years ago. Hanging beds came to Europe in 1492 with Christopher Columbus. Initially, hammocks were not used for recreation but provided protection from animals and insects which travelled on the ground at night.

MADE *OF* PAPER

It is not the best idea to wash paper. Surely, you know that. But what you probably do not know is that our paper bags are not afraid of getting wet. With synthetic latex impregnation, the cellulose that is used to manufacture them does not lose its properties even after laundering. The material which our bags and backpacks are sewn of is often referred to as leather for vegans because its production does not require the use of any ingredients of animal origin.
